OS Landranger 129		
Points of Interest		16
Walk Guide		18

### ABOUT THIS BROCHURE

Our members have been walking the Nottinghamshire Wolds for many years and have exceptional knowledge of the pathways and routes described. We have chosen the routes carefully to reveal the natural beauty of the Nottinghamshire Wolds.

Most ramblers also have a keen interest in the areas in which they walk; nature, history, geology or even something topical. The NOTTS WOLDS WAY traverses an area exceptionally rich in the natural and cultural heritage of Nottinghamshire. We claim no academic expertise in these matters, but drawing upon our personal experience, written and internet sources we have attempted to draw attention to several POINTS OF INTEREST. The Walk Guide and Map for each Stage is preceded by two pages identifying selected POINTS OF INTEREST and linking them to the appropriate Walk Guide and Map with numbered references. We have included these brief notes to enhance your enjoyment of the walk and perhaps stimulate return visits. There is so much more of interest to enjoy and explore.
